# TRILIPO

Contour + Tighten + Tone

A unique combination of  
TriPollar RF energy and  
Dynamic Muscle Activation

WORLD'S BEST  
NON-INVASIVE  
BUTT LIFT

LEADING NON-INVASIVE BODY  
CONTOURING TECHNOLOGY

- Targeted fat & cellulite reduction
- Skin tightening & firming
- Muscle toning

# Benefits of Choosing TriLipo

- 1. It works!** Clinically proven to be effective. See immediate and long-term results.
- 2. Most comfortable.** No burns, shocks, itching, numbing, or pain.
- 3. Safest treatment.** Works with the body, not against it.
- 4. Zero downtime.** Get back to your daily activity right away.
- 5. No lumps.** Smooth, natural-looking results!

## Cell Destruction

- Cryolipolysis (fat-freezing) and ultrasound cavitation
- Unnaturally kills fat cells
- Non-invasive, but painful!
- Destroys fat, but increases skin laxity

May provide the desired outcome in the short-term, but cause potential long-term adverse effects.

## TriLipo TriPollar RF + DMA

- Superior technology uses focused energy, consumes less power and delivers better results
- Releases fat from cells, removes fat, tones muscles, and reshapes the body with the addition of DMA
- Effective technology for reducing fat without destroying fat cells

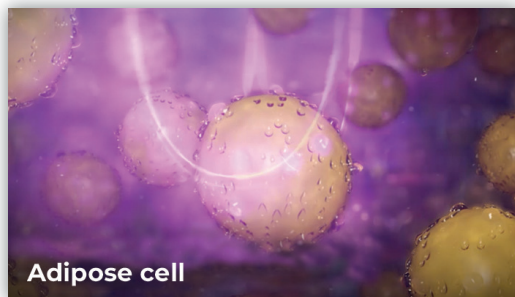

TriLipo is the only body contouring treatment that tightens skin, reduces fat, and enhances muscles, all in the same treatment!

## Bipolar Radio Frequency (RF)

- An older, inferior generation of RF technology
- Heating is more superficial and less focused
- Uses excessive power and increases risk of burns and hot spots

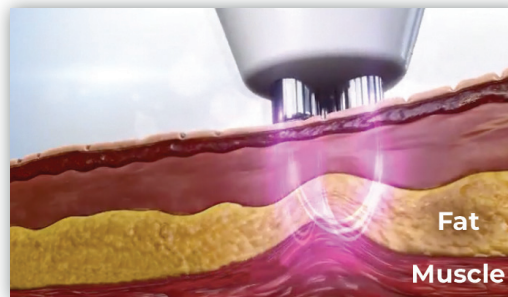

May be sufficient for skin tightening, but not effective enough for fat reduction.

**How TriLipo Works** TriLipo works on the skin, fat, and muscle layers at the same time, to deliver triple action fat reduction, skin tightening & muscle toning.

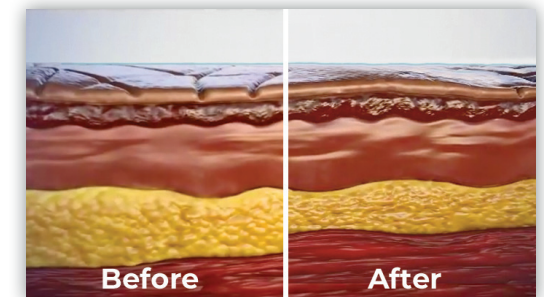

### 1. RELEASE

- TriPollar RF energy safely heats the fat layer
- The focused heat stimulates natural release of lipids from fat cells, without destroying them, just like intensive exercise would
- This natural process is also known as "Lipolysis"

### 2. REMOVE

- Fat loss is accelerated when DMA energy causes muscles to contract and squeeze fat cells
- The muscles push the released fat away from the cells towards the lymphatic drainage
- DMA promotes tissue detoxification and enhances muscle tone

### 3. RESHAPE

- Amplified lipolysis shrinks fat cells
- The focused heating also stimulates fibroblasts to produce new collagen and elastin fibers
- As a result the fat tissue lose volume, and the skin becomes tighter and more resilient for the long term
